## 1. Operating Results

The Bridgestone Corporation is referred to as the “Company”, and the Company and its subsidiaries are referred to as the “Companies”.

- (1) Analysis of Operating Results  
 [Operating results for fiscal 2015]  
 1) Sales and earnings

	Fiscal 2015	Fiscal 2014	Increase (Decrease)	
	Yen in billions	Yen in billions	Yen in billions	%
Net sales	3,790.2	3,673.9	116.2	3
Operating income	517.2	478.0	39.2	8
Ordinary income	507.3	463.2	44.0	10
Net income	284.2	300.5	(16.2)	(5)

During fiscal 2015 (January 1 to December 31, 2015), the operating environment surrounding Companies was as follows: the Japanese domestic economy continued gradual recovery with an improvement in company financial performance and the employment environment while the appreciation of the US dollar and lower price of crude oil continued. The United States economy continued steady recovery supported by an increase in consumer spending. The European economy has been affected by geopolitical risks, although it has been recovering. The Asian economic growth speed has been slow, particularly in China. Overall, many international economies were recovering weakly while the political and economic situation remained unstable.

Under these operating conditions, the Companies continued our work to realize the ultimate goal of becoming “a truly global company” and achieving “Dan-Totsu in all aspects of our business.” Stepping up efforts on a global scale, the Companies were working harder than ever to anticipate market trends and competitors’ movements, as well as enhance technologies and promote innovation to expand our line-up of highly competitive products and services, and building and enhancing business models to extend beyond the mere sales of products. Moreover, the Companies were striving to rapidly implement a range of initiatives to increase the sales of strategic products, strengthen supply capacity, improve manufacturing productivity, effectively utilize management resources, and develop eco-friendly products and businesses.

As a result, net sales in fiscal 2015 were ¥3,790.2 billion, an increase of 3% from fiscal 2014; operating income was ¥517.2 billion, an increase of 8%; ordinary income was ¥507.3 billion, an increase of 10%; and net income was ¥284.2 billion, a decrease of 5%.

In addition, the Companies have recorded an extraordinary loss of ¥43.5 billion from the deconsolidation of Venezuelan subsidiary, Bridgestone Firestone Venezolana, C.A. and its subsidiary.

## 2) Segment Information

		Fiscal 2015	Fiscal 2014	Increase (Decrease)	
		Yen in billions	Yen in billions	Yen in billions	%
Tires	Net Sales	3,174.4	3,093.3	81.0	3
	Operating income	472.7	435.8	36.9	8
Diversified Products	Net Sales	635.0	601.8	33.1	6
	Operating income	44.5	42.1	2.3	6
Consolidated Results	Net Sales	3,790.2	3,673.9	116.2	3
	Operating income	517.2	478.0	39.2	8

In the tires segment, the Companies worked to maximize sales momentum by introducing appealing new products globally, enhancing strategic products and reinforcing fundamental competencies such as specification optimization, and responding promptly to demand fluctuation in each region.

In Japan, due to the lower winter tire demand associated with warm winter, the unit sales of tires for passenger car and light truck decreased and the unit sales of tires for trucks and buses remained unchanged from fiscal 2014 due to an increase in the sales of original equipment tires. In the Americas, the unit sales of tires for passenger cars and light trucks in North America increased firmly and the unit sales of tires for trucks and buses increased steadily compared to fiscal 2014. In Europe, the unit sales of tires for passenger car and light truck tires increased strongly compared to fiscal 2014, as well as tires for trucks and buses. In China and Asia Pacific, the unit sales of tires for passenger cars and light trucks increased strongly and the unit sales of tires for trucks and buses increased steadily compared to fiscal 2014. In the specialty tire business, sales of large and ultra-large off-the-road radial tires for construction and mining vehicles were down year on year due to a delayed recovery in demand stemming from tire inventory adjustments at mines

As a result, net sales in the tires segment during fiscal 2015 totaled ¥3,174.4 billion, an increase of 3% from fiscal 2014; operating income was ¥472.7 billion, an increase of 8%.

In the diversified products segment, net sales totaled ¥635.0 billion, an increase of 6% from fiscal 2014, and operating income was ¥44.5 billion, an increase of 6% from fiscal 2014 due to an increase in the profit of BSAM Diversified Product business.

*(Note) The amounts for segment results include inter-segment transactions that are eliminated in calculating the consolidated results.*

[Projections for fiscal 2016]

The Companies' operating environment will continue to require careful attention due to such factors as fluctuations in exchange rates and the prices of raw materials and feedstocks, an ongoing lack of clarity in the global economic situation and international political conditions that remain unstable.

Amid such a challenging business environment, the Companies project the following results through the implementation of Mid-Term Management Plan initiatives.

		Fiscal 2016 projections	Fiscal 2015	Increase (Decrease)

- \* All indices are calculated using consolidated financial figures.
- \* Market capitalization is calculated as closing share price at the end of period x number of shares outstanding at the end of period (excluding treasury stock).
- \* For cash flow, the figure for net cash provided by operating activities in the consolidated statements of cash flows is used. For interest-bearing debt, the sum for all liabilities in the consolidated balance sheets for which interest is paid is used. For interest payments, the figure for interest paid in the consolidated statements of cash flows is used.

## (3) Basic policy for the appropriation of profits and dividends for the fiscal 2015 and 2016

Regarding the interests of shareholders as an important management priority, the Companies follow a basic policy of strengthening our management base in preparation for future business developments while working to improve business results. In regard to distributing profits to shareholders, the Companies conducts shareholder returns while maintaining an appropriate financial position and securing the internal revenues necessary for future growth investments. In determining dividend payments, the Companies comprehensively evaluates factors including business results, financial condition for the relevant fiscal period, medium-term earnings forecasts, investment plans, and cash flows. Based on these considerations, the Companies strive to live up to expectations of shareholders by issuing stable dividend payments targeting a consolidated payout ratio of 20%–40%.

The Companies pays dividends twice a year, comprising year-end and interim cash dividends. Year-end cash dividends are subject to approval by a resolution of the annual shareholders' meeting, while interim cash dividends are subject to approval by a resolution of the Board of Directors.

Further, the Companies strives to strengthen the long-term stability of our management base by using retained earnings to improve and expand production and sales systems and advance R&D activities in Japan and overseas.

For the fiscal 2015, the Companies plan to pay a cash dividend of ¥130 per share, comprising a year-end cash dividend of ¥70 per share and an interim cash dividend of ¥60 per share.

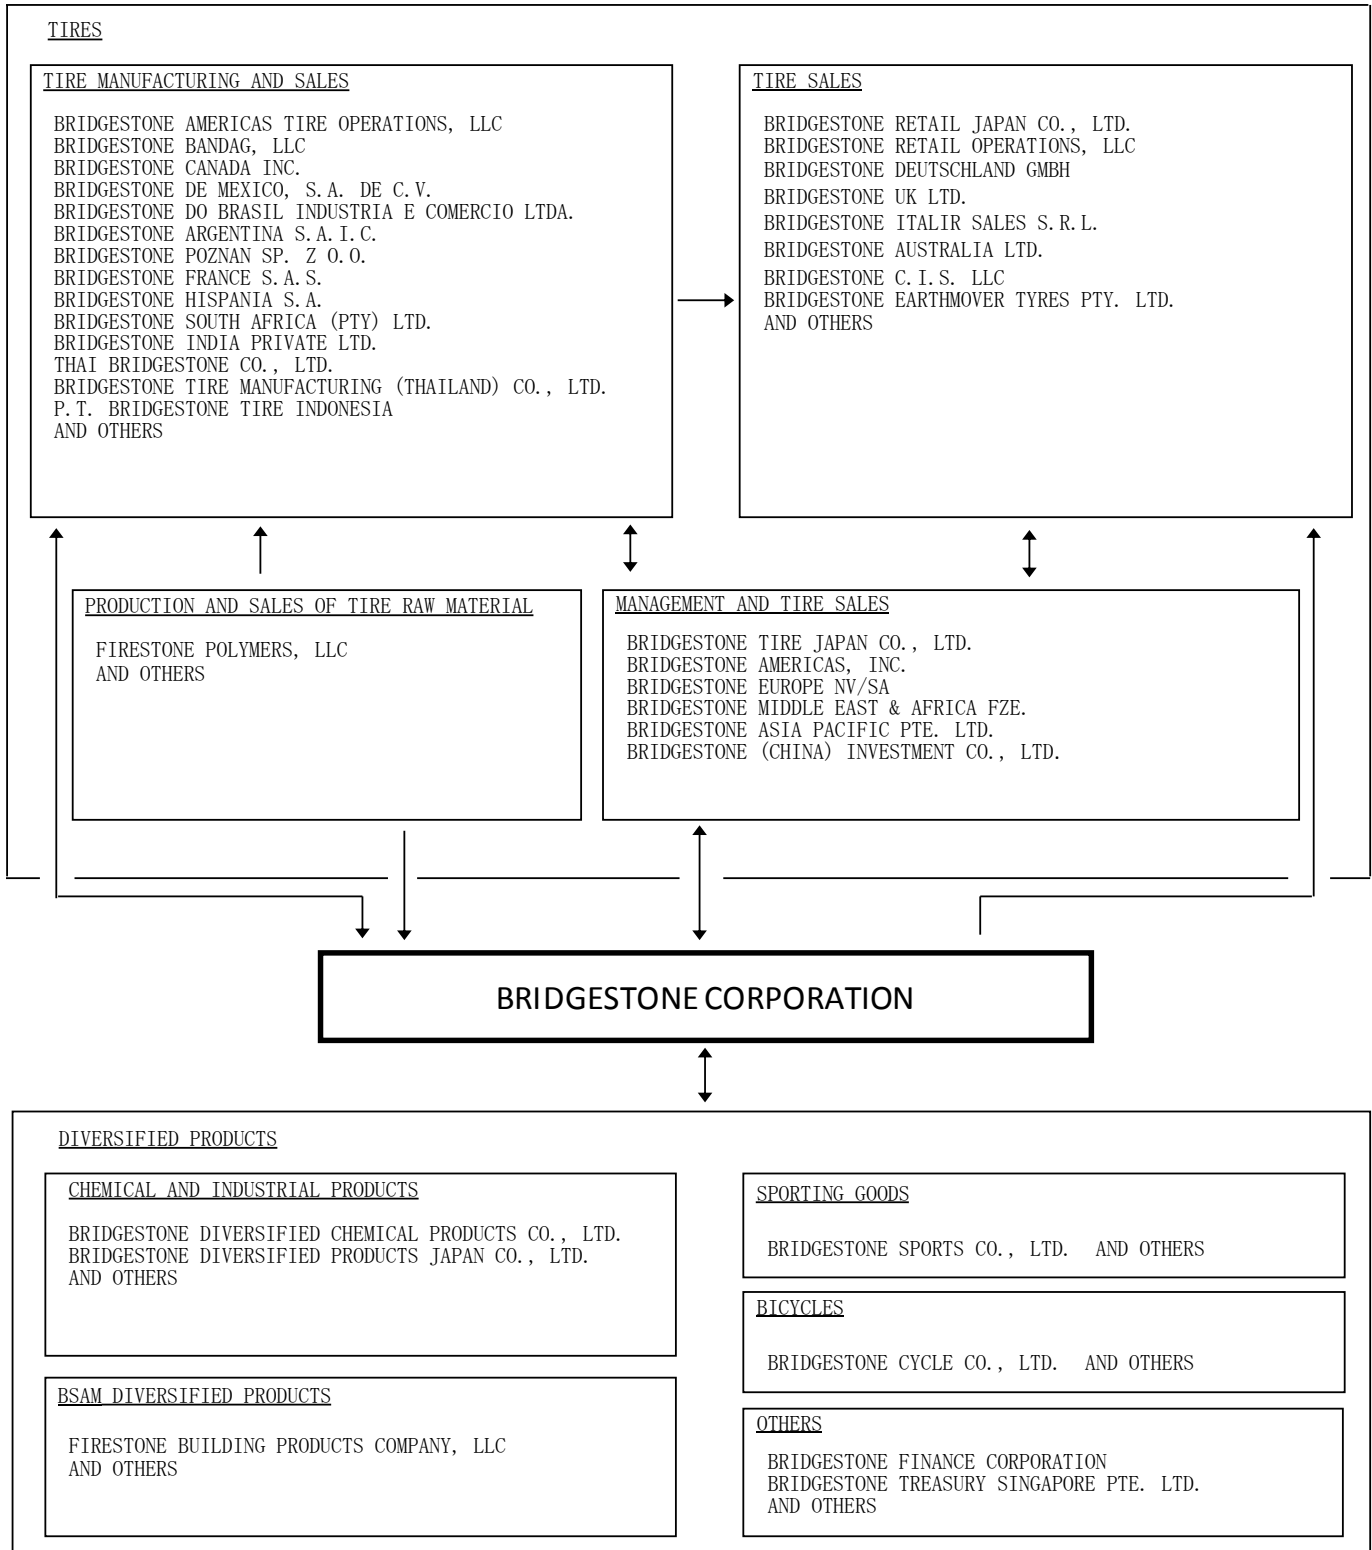

For the fiscal 2016, the Companies plan to pay a cash dividend of ¥140 per share, comprising a year-end cash dividend of ¥70 per share and an interim cash dividend of ¥70 per share.

### 3. Management Policies

#### (1) Basic Management Policies

The Companies will pursue the ultimate goals of becoming “a truly global company” and achieving “Dan-Totsu in all aspects of our business” based on a corporate philosophy that consists of a “mission”, “serving society with superior quality” and four “foundations” for fulfilling the mission — “*Seijitsu-Kyocho* [Integrity and Teamwork]”, “*Shinshu-Dokuso* [Creative Pioneering]”, “*Genbutsu-Genba* [Decision-Making Based on Verified, On-Site Observation]”, and “*Jukuryo-Danko* [Decisive Action after Thorough Planning]”. Further, as a responsible global company, the Companies will respect the social culture and values, comply with laws and statutory regulations, protect the global environment, and work on social contribution activities in the countries in which we conduct business activities contribute to society.

#### (2) Management Strategies and Tasks

The Companies’ operating environment is undergoing substantial change in a wide range of areas, including international relations, politics, the economy, the environmental problems, technological innovation. Social structures and consumer attitudes are also changing significantly.

In this setting, the Companies remain firmly committed to the basic stance of “Lean & Strategic” and “Group Global optimization.” In other words, the Companies maintain an optimum balance between short-term management and mid- and long-term management measures, with a focus on “Lean” in the short-term and “Strategic” in the mid- and long-term. At the same time, the Companies continue to implement management reforms, giving the highest priority to optimization on a group and global basis. In this way, the Companies strive to achieve the goals outlined above.

In accordance with this fundamental approach, the Companies make full use of “the Strategic Business Unit (SBU) based organization” and “the Mid-Term Management Plan (MTP)” as tools to improve the quality and the speed of management reforms.

The 2015MTP, which was announced in October 2015, includes three priority issues: “cultivating global corporate culture,” “developing human resources capable of global management,” and “upgrading the global management structure.”

In regard to the first item, “cultivating global corporate culture,” the Companies will ensure overall consistency on a group and global basis, promote the brand strategies as a part of a fully integrated marketing strategy. In an operating environment undergoing significant change, the Companies will reinforce our corporate structure to accelerate technology and business model innovation by taking actions such as the optimization of the R&D structure on a global basis, establishment of “Solutions Business Companies for Mining and Agricultural Machinery” which started on Jan.1, 2016. The Companies are also trying to anticipate market trends, expand our line-up of highly competitive products and services, and construct and enhance business models that will extend beyond the mere sales of products. The Companies are also pursuing continuous improvement in all areas of management. In these ways, the Companies will create customer value and ensure further development of our competitive advantage and differentiation.

In regard to the second item, “developing human resources capable of global management,” the Companies will promote global and regional talent rotations and also conduct training and development programs. The Companies will promote further development of environment and structure such as conducting global meetings including the Global Executive Operational Committee (Global EXCO) which is the highest body of global business execution in English to enable diverse talents to fulfill their potential.

In regard to the third item, “upgrading the global management structure,” the Companies will promote three activities: “enhancement of governance systems,” “restructuring of the tire business SBUs,” and “expansion of the diversified product business.”

In the “enhancement of governance systems”, the Board of Directors, held on Oct. 14, 2015, decided to propose the shift from "Company with Board of Company Auditors" to the "Company with Nominating Committee, etc." to the

next Annual Shareholder's Meeting to be held in March 2016. The Companies have determined that the introduction of the "Company with Nominating Committees etc." model of corporate governance at this time will serve to further strengthen our internal control systems while enabling both more effective strategic planning and efficient decision making.

In the "restructuring of the tire business SBUs," the Companies restructured the Europe SBU by merging the Middle East, Africa, and Turkey, and will further continue to pursue the optimization of our global management system.

In the "expansion of the diversified product business," the Companies will promote the globalization of major businesses of conveyor belt, anti-vibration rubber, etc. to guide the diversified product business to its next growth spurt. In addition, the Companies strengthen the expansion of its solution business including services, rather than simply combining existing product-based businesses.

In addition, the Companies will step up efforts to build systems to support the fulfillment of responsibilities as a corporate group toward all of our stakeholders. To meet this objective, the Companies have enhanced our corporate philosophy structure, beginning with the refinement of corporate philosophy in 2011. Subsequently, the Companies refined the Environmental Mission Statement and the Safety Mission Statement, and completed the series of initiatives with the adoption of the Quality Mission Statement in 2015. Going forward, the Companies will deploy, sustain, and evolve our business activities on a group-global basis based on this corporate philosophy structure. The Companies will review our policy as needed for the development of internal control systems that ensure appropriate operations and steadily develop systems in accordance with the policy. The Companies' corporate social responsibility activities will establish systems and heighten the effectiveness of activities in all areas, including rigorous risk management for environmental protection, product safety, compliance and disaster prevention and safety initiatives; employee education; and corporate citizenship activities. The Companies remain committed to further enhancing compliance systems, based the reflection of a plea agreement with the U.S. Department of Justice in relation to cartel activities with respect to the sale of anti-vibration rubber products for vehicles in February 2014.

#### **4. Basic Policy on the Selection of Accounting Standard**

The Companies prepare and disclose our Consolidated Financial Statements in accordance with "Japanese Generally Accepted Accounting Principles". With respect to International Financial Reporting Standards (IFRS), the Companies have the plan for voluntary adoption of IFRS in the future. Timing of the adoption is under consideration.

(5) Notes to the consolidated financial statements

(Notes regarding going concern assumption)

Not applicable

(Basic important matters for preparation of consolidated financial statements)

1. Scope of consolidation

1) Number of consolidated subsidiaries: 300 companies

Names of principal companies:

Refer to "2. BRIDGESTONE Group's Major Subsidiaries and Business Relation Flowchart"

Changes in scope of consolidation:

Additions: 5 companies (Mainly, increased by establishment)

Deletions: 15 companies (Mainly, decreased by deconsolidation)

2) Name of principal unconsolidated company

BRIDGESTONE FIRESTONE VENEZOLANA, C.A.

(Reason for deconsolidation)

Under US GAAP, the Companies have excluded Venezuelan subsidiary, Bridgestone Firestone Venezolana, C.A. ("BFVZ") and its subsidiary from its consolidated financial statements because other-than-temporary lack of exchangeability between the Bolivar and the U.S. dollar is restricting the subsidiary's ability to purchase raw materials and pay dividends on a sustainable basis.

2. Scope of application of equity-method accounting

1) Number of equity-method affiliates: 145 companies

Name of principal company

BRISA BRIDGESTONE SABANCI LASTIK SANAYI VE TICARET A.S.

Changes in the scope of equity-method accounting

Additions: 2 companies (Increased by establishment)

2) Name of principal unconsolidated subsidiary to which the equity-method is not applied

BRIDGESTONE FIRESTONE VENEZOLANA, C.A.

(Reason for not applying the equity method)

Under US GAAP, the Companies have excluded Venezuelan subsidiary, Bridgestone Firestone Venezolana, C.A. ("BFVZ") and its subsidiary from its consolidated financial statements because other-than-temporary lack of exchangeability between the Bolivar and the U.S. dollar is restricting the subsidiary's ability to purchase raw materials and pay dividends on a sustainable basis.

3. Summary of significant accounting policies

1) Valuation policies and methods for investments in securities

Available-for-sale-securities

With market value — Fair value based on the market price, etc., at the fiscal year end.

(Unrealized gain and loss are recorded in net assets, and the moving-average method is used to calculate the cost of securities sold.)

Without market value — Primarily the moving-average cost method.

2) Valuation policies and methods for derivatives

In principle, fair value.

3) Valuation policies and methods for inventories

Inventories are principally stated at lower of cost determined by the moving-average method or net selling value. Meanwhile, inventories held by subsidiaries in the Americas are substantially stated at the lower of cost, which is determined principally by the last-in, first-out method.

4) Depreciation method for fixed assets

For tangible fixed assets, the declining-balance method is used at BRIDGESTONE CORPORATION (the "Company") and its domestic subsidiaries, and the straight-line method is used at overseas subsidiaries. For intangible fixed assets, the straight-line method is used.

5) Accounting policies for reserves and allowances

a) Allowance for doubtful accounts

In order to reserve for loss from the nonpayment of claims, the actual credit loss rate is used to calculate the amount to be recorded for general claims, and for designated claims for which there is a concern of nonpayment, an amount based on the evaluation of potential loss in the receivables outstanding is recorded.

b) Provision for sales returns

Principally, in order to provide for future losses on the return of snow tires, historical losses are used to estimate the amount of future losses, and that amount is recorded.

c) Provision for recall

In order to reserve for outlays related to check and replacement of object tires, an estimated amount of future obligations is recorded.

d) Warranty reserve

Warranty reserve, included in other liabilities, is estimated and recorded at the time of sale to provide for future potential costs, such as costs related to after-sales services, in amounts considered to be appropriate based on the Companies' past experience of the Companies and subsidiaries (collectively, the "Companies").

e) Provision for environmental remediation

In order to reserve for outlays for legally required removal and disposal of polychlorinated biphenyl ("PCB") and other, the estimated amount of future obligations is recorded.

6) Accounting policies for retirement benefit

a) Method of attributing projected benefit to periods

To attribute projected benefit to periods of service up to the end of the current fiscal year, the Companies, domestic subsidiaries, and certain overseas subsidiaries attribute the benefit under the benefit formula basis. In addition, at certain overseas subsidiaries, an estimated total amount of expenses for postretirement benefits except for pensions is allotted based on the number of years of service provided by the employees.

b) Method of recognizing unrecognized actuarial gain/loss and past service cost

Past service cost is treated as an expense using the straight-line method over a fixed number of years based on the average remaining years of service of the employees in the year in which the past service costs occur (10 years for the Companies and domestic subsidiaries, 3 to 12 years for overseas subsidiaries).

Actuarial gain/loss at the Companies and our domestic subsidiaries is treated as an expense using the straight-line method over a fixed number of years (10 years) based on the average remaining years of service of the employees in the year in which the gain/loss occurs, recorded from the following fiscal year.

For certain of our overseas subsidiaries, unrecognized actuarial gain/loss at the beginning of the fiscal year that exceed 10% of the larger of retirement benefit obligations or pension plan assets is treated as an expense using the straight-line method over a fixed number of years (8 to 12 years) based on the average remaining years of service of the employees.

7) Accounting policies for the conversion of foreign currency-denominated assets and liabilities into yen

Monetary receivables and payables denominated in foreign currencies are translated into Japanese yen at the exchange rate at the consolidated balance sheet date. The foreign currency exchange gain and loss from translation are recognized in income.

Assets and liabilities of the Companies' overseas subsidiaries are translated into Japanese yen at the current exchange rate at the consolidated balance sheet date. Revenue and expense accounts of the Companies' overseas subsidiaries are translated into Japanese yen at the average annual exchange rate. Differences arising from such translation are shown as foreign currency translation adjustments and minority interests in a separate component of net assets.

8) Hedge accounting

a) Hedge accounting method

Deferred hedge accounting is applied. Designation accounting is used for forward foreign exchange and foreign currency swaps that meet the requirements for designation accounting, and exceptional accounting is used for interest rate swaps that meet the requirements for exceptional accounting.

b) Hedging instrument and items covered

<u>Instruments</u>	<u>Items covered</u>
Forward foreign exchange contracts	Foreign currency-denominated monetary claims and obligations, and forecasted foreign currency-denominated transactions
Foreign currency swaps	Borrowings and bonds
Interest rate swaps	Borrowings
Commodity swaps	Raw materials

c) Hedging policy

Forward foreign exchange transactions are used only to cover actual foreign exchange needs, and foreign exchange swaps are made to match the principal amount and term of the hedged foreign currency-denominated obligation. Interest rate swaps are entered into for the amount of borrowings only. Commodity swaps are entered into for the trade amount of raw materials. It is the Company's policy not to use any derivative transactions for speculative purposes.

d) Method for evaluating the effectiveness of hedges

The validity of hedges is evaluated based on a comparison of total fluctuations in the cash flow or fluctuations in the market value of the hedged item with the total fluctuations in the cash flow or fluctuations in the market value of the hedging instrument. However, for items covered by designation or exceptional accounting, the validity of the hedge is not evaluated.

9) Amortization of goodwill

Goodwill is amortized using the straight-line method over the period for which it is deemed to have effect, but not to exceed 20 years.

10) Definition of cash and cash equivalents for Consolidated Statement of Cash Flow

Cash and cash equivalents included in the consolidated statement of cash flows consists of cash on hand, deposits that can be withdrawn at any time or are easily convertible, and short-term investments maturing within three months from the date of acquisition and for which the risk from price movements is deemed negligible.

11) Other significant items related to the preparation of consolidated financial statements

Accounting treatment of consumption tax

Consumption tax and local consumption taxes are excluded.

(Changes in accounting policies, etc.)

(Application of Accounting Standard and Guidance for Retirement Benefits))

For the “Accounting Standard for Retirement Benefits” (ASBJ Statement No. 26, May 17 of 2012 , hereinafter referred to as the “Retirement Benefits Accounting Standard”) and the “Guidance on Accounting Standard for Retirement Benefits” (ASBJ Guidance No. 25, March 26, 2015, hereinafter “Retirement Benefits Guidance”), the Companies have additionally applied the provisions set forth in the main clauses of Paragraph 35 of the Retirement Benefits Accounting Standard and Paragraph 67 of the Retirement Benefits Guidance from the current fiscal year. With this application, calculation methods for retirement benefit obligations and service costs were revised as follows: The method for attributing projected benefits to periods changed from the straight-line basis to the benefit formula basis. In addition, determination of the discount rate changed from a method based on the number of years approximating the average remaining years of service of the employees to a method using a single weighted average discount rate reflecting the estimated period and amount of benefit payment.

In accordance with the transitional treatment prescribed in Section 37 of the Retirement Benefits Accounting Standard, the effect of the accounting change in retirement benefit obligations and service costs was adjusted in retained earnings at the beginning of the current fiscal year.

As a result, net defined benefit asset decreased by ¥14,472 million, net defined benefit liability increased by ¥14,223 million and retained earnings decreased by ¥18,729 million at the beginning of the current fiscal year. The effect of this change on operating income, ordinary income, and income before income taxes and minority interests for the current fiscal 2015 year was immaterial

The impact of this change on net assets per share in current fiscal year was ¥23.91. The effect of this change on net income per share and diluted net income per share in current fiscal year were immaterial.

## (Changes in presentation)

## 1. Consolidated Statement of Income

In the Consolidated Statement of Income, "Share of profit of entities accounted for using equity method" in "non-operating income" was presented separately in the previous fiscal year. Due to a decline in financial materiality, "Share of profit of entities accounted for using equity method" is now presented in "Other." To reflect this change in method of presentation, the consolidated financial statements for the previous fiscal year have been reclassified.

As a result, the ¥ 4,099 million that had been previously presented as "Share of profit of entities accounted for using equity method" in the Consolidated Statement of Income for the previous fiscal year is now included in "Other."

## 2. Consolidated Statement of Cash Flows

## 1) "Increase(decrease) in allowance for doubtful accounts" and "Share of (profit) loss of entities accounted for using equity method"

In the Cash Flows from Operating Activities section, "Increase (decrease) in allowance for doubtful accounts" was included in "Other" in the previous fiscal year. Due to an increase in financial materiality, "Increase (decrease) in allowance for doubtful accounts" is now presented separately. "Share of (profit) loss of entities accounted for using equity method" was presented separately in the previous fiscal year. Due to a decline in financial materiality, "Share of (profit) loss of entities accounted for using equity method" is now presented in "Other." To reflect these changes in method of presentation, the consolidated financial statements for the previous fiscal year have been reclassified.

As a result, in the Cash Flows from Operating Activities section, the ¥ (1,489) million that had been previously presented as "Share of (profit) loss of entities accounted for using equity method" and the ¥ (18,472) million that had been previously presented as "Other" in the Consolidated Statement of Cash Flows for the previous fiscal year have now been restated as "Increase (decrease) in allowance for doubtful accounts" of ¥205 million and "Other" of ¥ (20,167) million.

## 2) "Payments of long-term loans receivable"

In the Cash Flows from Investing Activities section, "Payments of long-term loans receivable" was included in "Other" in the previous fiscal year. Due to an increase in financial materiality, "Payments of long-term loans receivable" is now presented separately. To reflect this change in method of presentation, the consolidated financial statements for the previous fiscal year have been reclassified.

As a result, in the Cash Flows from Investing Activities section, the ¥(36,208) million that had been previously presented as "Other" in the Consolidated Statement of Cash Flows for the previous fiscal year have now been restated as "Payments of long-term loans receivable" of ¥(479) million and "Other" of ¥(35,729) million.

## 3) "Proceeds from minority interests for additional shares"

In the Cash Flows from Financing Activities section, "Proceeds from minority interests for additional shares" was included in "Other" in the previous fiscal year. Due to an increase in financial materiality, "Proceeds from minority interests for additional shares" is now presented separately. To reflect these changes in method of presentation, the consolidated financial statements for the previous fiscal year have been reclassified.

As a result, in the Cash Flows from Financing Activities section, the ¥1,353 million that had been previously presented as "Other" in the Consolidated Statement of Cash Flows for the previous fiscal year have now been restated as "Proceeds from minority interests for additional shares" of ¥934 million and "Other" of ¥419 million.

## (Additional Information)

Bridgestone Retail Operations, LLC (BSRO), a wholly owned subsidiary of Bridgestone, and The Pep Boys – Manny, Moe & Jack (Pep Boys), one of the nation's leading automotive aftermarket chains in U.S, had entered into a definitive merger agreement under which BSRO would acquire Pep Boys. However, BSRO determined not to present a counter offer to acquire Pep Boys in response to the proposal from Icahn Enterprises L.P. of \$18.50 per share. With the cancelation of this merger agreement, BSRO records the penalty income from Pep Boys of ¥4,783million in current fiscal year.

## (Segment Information)

## 1. Overview of reporting segments

The Companies' reporting segments are components of the Companies whose separate financial information is obtainable, and the Board of Directors and the Management Committee regularly consider these segments in order to decide the allocation of business resources and evaluate business performance.

The Companies' reporting segments consist mainly of Tire business including the production and sale of tires and tubes, sale of wheels and accessories, the production and sale of retread material and services, auto maintenance, and Diversified products business including Chemical and Industrial Products, BSAM Diversified Products (Note), sporting goods, bicycles, etc. Thus, the Companies have two reporting segments: Tires and Diversified products.

(Note)BSAM Diversified Products: A business under BRIDGESTONE AMERICAS, INC. supplying commercial roofing materials etc.

## 2. Methods of calculating amounts for Sales and Income (Loss), assets and other items by reporting segment

The accounting treatment methods for each reported business segment are broadly similar to those outlined in "Basic important matters for preparation of consolidated financial statements". Reporting segment income figures are on an operating income basis. Internal sales and transfers between segments are mainly based on prices for third-party transactions.
