

BRIDGESTONE

TOOLBOX

Fleet and tyre monitoring system,
available exclusively for Bridgestone Partners.

Toolbox is a user-friendly application that helps you manage your existing and potential fleet customer portfolio and enables your salesforce to become professional Tyre Consultants.

With the **Toolbox** tyre inspection and monitoring application you can build strong insights on individual fleet needs and tyre performance. This will lead to continuously improved tyre maintenance policies.

BENEFITS

FLEET PROFILE

Establish a detailed profile of your fleet and its specific requirements.

TYRE INSPECTION

Perform periodic sample tyre inspections which result in clear and user-friendly reporting.

SAVING AREAS

Identify potential saving areas and recommend improvements.

3 different analysis providing you full insight

1 In-Service Tyre Inspection

Checking the pressure, tread depth and condition of the tyres on your vehicles to assess product and maintenance performance.

2 Out-of-Service Tyre Inspection

Much can be learned by inspecting removed tyres. By understanding the causes of recurring damages to your tyres, we can identify appropriate countermeasures.

3 Tyre Performance Monitoring

Live performance testing of tyres to factually evaluate and demonstrate the highest performance and lowest Cost Per Km.
